

Cardiac PET Workshop at ASNC2024

Early Career Workshop: Get Ahead of the Curve with Cardiac PET!

On **Saturday, September 7**, ASNC in conjunction with the ACC Texas Chapter will host for Fellows-in-Training and Early Career members a PET Workshop from 1:00PM – 5:00PM.

You are the future of nuclear cardiology. ASNC wants you to be excited about the potential of Cardiac PET to improve clinical decision-making for your patients. **Have you considered where cardiac PET could take your practice?** In response to requests from our community, ASNC is hosting the Cardiac PET Workshop where experts will show how your lab and your patients will benefit from a cardiac PET program.

The workshop will feature **read-with-the-experts cases** as well as focused didactic presentations and panel discussion highlighting –

- The **value of PET myocardial perfusion imaging** in patient care;
- Processes and protocols for **myocardial blood flow assessment**; *and*
- Tips and tricks from physicians who are **directing successful cardiac PET programs** in different practice environments.
